

She was being walked when we came in the drive and she was very mannerly on the leash. We looked around the kennels for potentials and at hers on our way out she wouldn't even come to the door. She had that look like "Great someone else that won't take me" and kept her head down. My wife knelt next to the door and she finally decided to give us a try. She rested her head in my wife's hand and just asked for some love. We took her out and she had such a good temperament and loving playfulness that we took her on the spot.

We took her home where we had a Chihuahua and a min pin and she took to the boys immediately. They played for hours until the boys were finally worn out and ready to sleep for the rest of the day. We went to the dog park and she was terrified of the other dogs at first. We wandered around with her at my side nearly in my arms while she got used to everyone. After about an hour she started playing with a small puppy and never had a second thought. She was my companion while I worked in Midland and everyday went to the local dog park to play with various dogs. She had a lot of friends at that park that came at regular times with us and she just loved it. She's very gentle with the smaller dogs and loves them to death.

I love this dog so much. Thank you for such a wonderful pet.
