

I have always been a dog person. I have never had a cat in my life. Our dog (a Corgi) died at the beginning of 2014 after 8 years of ownership. I had promised my husband that it will be his turn to pick our next pet. We felt that it was time for new companionship! This is how our story began. On Sept. 5, 2014, we visited Aggieland Humane Society to look for a pet. We spotted 2 cats in a cage. They were 4 months old sisters. A brown tabby named Reno (who is now Annie) and a blue tabby named Raleigh (who is now Bella). After a short visit, my husband immediately got a connection with Annie. He took her out of her cage and into the play room. Bella was left in the cage. Bella kept stretching her hand out and meowing to me. After Annie showed off her charm, my husband decided to adopt Annie. He was only looking to adopt one pet. We went to the office and signed all the papers and was told to pick up Annie the next day. But something bothered me I could not sleep the entire night. I kept thinking of how sad I would be if somebody separated me from my sister who was the only family I had. The next day, without telling my husband, I went back to Aggieland to adopt Bella too and took both of them home together. I had no experience with cats but I knew that's the right thing to do. After work, my husband came home all excited to see his brown tabby. Instead, Bella, the blue tabby, walked out from the room to greet him first. My husband was shocked and shouted 'that's the wrong cat!' My heart was pounding when Annie suddenly entered the room. My husband quickly came around to my way of thinking and welcomed them both into our lives. Since then, we have been enjoying their company emencely. They are very sweet and they show their love to us constantly. Each evening, Annie will jump on my husband's lap while Bella will sit with me on the couch. As my husband said, they are our "Bundle Of Joy". Thank you Aggieland Humane Society for saving these lovely furry "bundles of joy" and bringing them into our lives.
